Subject: Honolulu Rail Project Required Permits and Approvals

Hi Kathy –

These are the required permits and approvals:

- Archaeological Inventory Survey Plan
- Building Permit
- Clean Water Act, Section 401, 402 and 404
- Farmland Conversion Impact Rating
- Flood Hazard District Compliance
- Interstate Access Modification and Airspace Approvals
- Section 10, Rivers and Harbors Act
- Sole Source Aquifer
- Certificate of Inclusion, HDLNR (Division of Forestry and Wildlife)
- Coastal Zone Management, Federal Consistency Determination
- Drainage Injection Control
- FAA Part 77
- Section 106, National Historic Preservation Act, Memorandum of Agreement
- National Pollutant Discharge Elimination System (Dewatering)
- National Pollutant Discharge Elimination System (General)
- Noise Permit and Variance
- Road Closure
- Runway Protection Zone Construction Waiver
- Special Management Area
- Stream Channel Alteration
- Stormwater Connection (MS4)

Kathy, this list is slightly different from what you had before. I think it is because previously you only included State approvals. The above list is all inclusive; federal, state and city.

Let me know if you need anything else.
