Subject: SCC Worksheets and New Starts Templates

Jim,

Attached are updated SCC worksheets, reflecting the project budget recommended in the July 2009 Jacobs Spot Report (with increased finance charges consistent with the August Financial Plan).

Also attached are updated New Starts Templates reflecting these cost adjustments as well as template changes from the FY2011 Reporting Instructions.

Please note that the costs shown in both attachments reflected the estimated FFGA Total Project Cost. This cost is a subset of the cost shown in the August Financial Plan, since the August Financial Plan includes costs incurred prior to Preliminary Engineering as well as finance charges incurred after completion of the project.
