Classification: UNCLASSIFIED
Caveats: FOUO

Hello Ms. Miyamoto,

Per our conversation, please let us know if there are any further comments required for the attached letter.

The 30th Signal Battalion Network Enterprise Center (NEC) Hawaii (HI) Infrastructure Management Group (IMG) (aka Signal) is the Authority Holding Jurisdiction (AHJ) for all US Army communications facilities on island. In addition to US Army Signal there is the Government Service Provider, AT&T under the JHITS contract that provides and maintains facilities for the four branches of US Military Service.

We have been contacted by the GEC as well as three different contractors for requests and accesses to US Military facilities that route parallel and perpendicular to the proposed WOFH and Kam/Airport segments.

Additional concerns that may affect the EIS are the fuel lines that service Hickam, these may need to be disclosed (if required).

Please let me know if you have any concerns.

Thanks,

Very Respectfully,

Darrell B. LeRoux Jr.
Engineering, EMC-IMG

Classification: UNCLASSIFIED
Caveats: FOUO

Ginger,

The information addressed in the attached letter needs to be forwarded to the 30th Signal Bn/NEC S3, Mr Takeya. My office will be tasked to provide input back in March. Until we received the attached document, we were not aware of this action.

We have been working with the State/City and the contractor for this project and providing information. I will ensure your office is copy furnished and response or information provided to the activities above in the future.

Mr Leroux (engineer) and Ms Hironaka (functional JTS Manager) are assigned internally to work the overall project. To Date Ms Hironaka has already provide maps and information to these individuals for phases from Kapolei to Pearl City. This office has not received anything from Pearl City to the areas raised in this memo.

Prior to this, 12 Aug 2009, review of segments B/C and Pearl Highlands were reviewed and comments were provided, and on Dec 16 2008, this office received Baseline Draft Corrosion Survey and report was received and reviewed and comments were provided by to the requestor. I will ensure that Ms Hironaka forwards this information for your records.

Note that the letter attached states that 3 CD were attached for this requirement. This office has not seen this memo nor received these CD. Until we are aware of the requirement, input cannot be provided. Please get this information to this office ASAP. Please ensure this information is passed through the 30th Signal Bn/NEC S3. There are JTS facilities in this area, in which the Army wants to keep intact for future upgrade plans. Thank-you for your understanding in this matter.

V/R,

Daniel D. Munoz, YC-2

Gentlemen:

Our GC suspense date has past. Please review and comment on this project's impact to communication infrastructure.

Need immediate response.
