Susan/Jim: Please note the attached assessments of both NTP #1 and NTP #1A as recently "informally" submitted by the Honolulu project sponsor. This is very timely and will require a rewrite of our draft letter currently with the Administrator. To focus your attention, I point you to page 6 of the first attachment which addresses the PMOC's conclusions, and which are for the most part favorable towards meeting the 1/19/07 DB FR for pre-NEPA completion authority AND the intent of our PE approval of 10/16/09. I believe Renee and Nancy-Ellen had in mind a more simpler "acknowledgement/thank you/stick to the 2007 Federal Register" response letter to Honolulu in light of this weeks most recent submittals. Please advise of suggested next steps.
