MP-8 SUSTAINABLE PRACTICES

MP-8.1 SUSTAINABLE DESIGN

The Core Systems Contractor shall include sustainable strategies for the Project design and construction with the goals of achieving sustainable principles of resource conservation, energy efficiency and reduction of environmental impacts. The Core Systems Contractor shall provide a qualified Sustainability Coordinator to manage the development of a Sustainability Action Plan and coordinate the program implementation.

The Core Systems Contractor shall develop a Sustainability Action Plan for City Review and Comment prior to submittal of final design.

MP-8.2 SUSTAINABILITY ACTION PLAN

The Core Systems Contractor is responsible for developing a Sustainability Action Plan. The Plan shall:

- A. Comply with the Compendium of Design Criteria: Chapter 26 – Sustainability.
- B. Describe how the Project’s sustainability goals and sustainability principles are incorporated into the project design and construction.
- C. Address how components of the “HHCTCP – Contract Sustainability Report” are to be incorporated.
