Sent them an email today, which probably resulted in Ken's call to you. He may need at least a couple of days since they are doing neighbor island over the shoulder reviews as part of our STIP mtgs. Let me check with Jeff too.

Subject: FEIS Review

Brennon,

I appreciate your earlier willingness to expedite the review. On April 28, we sent copies to you for Tatsuguchi's use and also to Jeff Chang at the airport. We offered Ken to do the walk through of the new document but he did not take it. Ken called today and asked for a two week extension. Please understand we cannot agree to the extension. Faith called Jeff today but he did not indicate when he is giving us his comments.

The Highways should not have any issues with this version of the FEIS since only changes from the old version they had reviewed before is the Ualena alignment that does not affect them. The Airports' review should be easy too because they had been following the Ualena issue and there should not be any surprises.

Brennon, I have to ask you for your help in getting their review done in a day or two. We were assured by the other cooperating agencies that they'd meet the deadline so I really would like to finish this process.

Thank you for understanding my urgency.

Toru
