Carl:

The letter says that they are using an existing precast yard. We told them on a conference call that if they use a commercial site where precasting is already taking place for other non-FTA projects, we are not responsible for the impacts. This scenario would be similar to the location of rail vehicle assembly plant – a commercial operation that is already in place at a particular location not as a result of our project.

**Subject:** FW: Honolulu High-Capacity Transit Corridor Project

FYI – Can we quickly reference the FEIS and determine if the site noted in the attached letter is identified in the environmental document? Thanks!

Leslie

Hi, Leslie...attached is an advanced copy of a letter regarding the pre-cast yard. The original will be mailed to you today.

Thank you.
