We just had a call with the Administrator and she was concerned about Hawaii getting ahead of itself with regard to the \$2.6B proposal for a new a light rail. It went about 30 minutes. We really did not discuss the current situation other then letting her know that the IOS project has gone awry and that they are having trouble with getting sufficient consensus to get the project in the TIP. Joe note my other e-mail since she want us to do a briefing for a call that she wants to place to the Governor. Ray

Ray:

During our conference call on Honolulu yesterday, you (or was it Jim Kenna?) said that you would be talking to the Administrator about Honolulu in the very near future. What was that about? Is someone in Honolulu going over your head to get approval to advance part of the project with local funds only? Or are they lobbying for Final Design approval? Has your conversation with TOA-1 occurred yet and if so what was it about? Trudy and I were wondering.

Joe
