Subject: FHWA and Honolulu Project

All,

I spoke to Jody Chew at FHWA HI Division, she stated that FHWA had submitted more than one comment letter on drafts of the EIS but that the City had worked with them and their concerns were addressed. She stated that as a cooperating agency, FHWA plans to issue a CE for use of the airspace for their nexus of the project (where the project crosses above the highways). I told Jody FTA will consider if any additional documentation of the FHWA position s needed; she replied FHWA would be glad to accommodate us if we let them know what we want.

I asked the City to send me the record of written communication from FHWA and any responses from the City, which I will distribute upon receipt.

Ted Matley
