Subject: honolulu rapid transit, protected species concerns

Aloha Jan and Amy,

Thanks for the good meeting on January 8, concerning potential endangered and threatened species concerns regarding the Honolulu Rapid Transit project. I felt that meeting was productive and informative.

Recently DLNR sent a letter concerning the environmental review for that project, including remarks on protected species concerns, particularly with regard to the existing Abutilon HCP and potential disturbance of white terns in the Kapi'olani area. In case you need some clarification or additional information on those items, please feel free to contact me directly.

Paula
