Subject: Honolulu High-Capacity Transit Corridor Project
Attachments: E8-30210.pdf

This is to inform you that the comment period for the Honolulu High-Capacity Transit Corridor Project Draft Environmental Impact Statement/Section 4(f) Evaluation has been extended to February 6, 2009 by the Federal Transit Administration. See attached Federal Register notice.

This document is a joint NEPA/Chapter 343 document. The availability of this document was noticed in the November 23, 2008 OEQC Environmental Notice, which would make the end of the 45-day comment period, January 7, 2009. Would it be possible to notice the extension of the comment period to February 6, 2009?
